Continuation of Disposition of Claims: Claims withdrawn from consideration are 1,3-8,10-12,17,19,20,22-30,33-38,41-43,45-48 and 52-58.

***Election/Restrictions***

Claims 1,3-8,10-12,17,19,20,22-30,33-38,41-43,45-48,52-58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on February 17, 2010.

Applicant's election with traverse of the species of figures 5a-b in the reply filed on February 17, 2010 is acknowledged. The traversal is on the ground(s) that claim 52 has been amended so that it reads on the species in figures 5a-b as well as figures 6a-d. This is not found persuasive because for a claim to be generic it must read on all disclosed/claimed embodiments. Furthermore, applicant's argument is not understood with regard to why the election of species would be improper. It should also be noted that the specification fails to disclose that the embodiment shown in figures 5a-b include reflective surfaces that are non-parallel or curvilinear. The non-elected embodiment of figures 6a-d includes such features.

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15, 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, fails to broadly disclose that the second member secures one of the fibers and the first member secures the other fiber. The specification only provides support for the second member securing the collection fiber and the first member securing the delivery fiber.
